DETAILED ACTION

Response to Amendment

1. This office action is in response to the amendment submitted on 07 June 2005. Currently claims 1-4 are currently pending.

Response to Arguments

2. Applicant's arguments, filed 07 June 2005, with respect to the rejections of claims 1-4 under 35 USC 112 1st and 2nd paragraphs have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new grounds of rejection (obviousness type double patenting) is made in view of applicants copending application No. 10/484,638 (US Patent Publication No. 2005/0016420).

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-4 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2 of copending Application No. 10/484,639 (US Patent Publication No. 2005/0016420).

Although the conflicting claims are not identical, they are not patentably distinct from each other because the reduction to practice of the claims of the copending application would render obvious the instant claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The claims of the copending application are broad enough to encompass the claims of the instant application and therefore they are obvious over those claims.

Prior Art Cited In The Specification

5. Applicants should provide copies and any applicable translations or English language equivalents of the foreign references cited and described in applicant's specification on page 2 (52-103450 and 45-33552) as they are unavailable to the examiner and considered pertinent to applicant's disclosure. **This is a second request for copies of these documents. Applicant merely submitted a copy of a title page for JP52-103450 (i.e. no document or abstract) and a blank search result for JP45-33552 and accordingly the request is hereby repeated. Submission of the requested documents is REQUIRED in responding to the instant office action.**

Information Disclosure Statement

6. The submission of a result list for JP52-103450 and JP45-33552 is not a proper submission for an IDS. Submission of the documents is required.
